Response to Amendment

Applicants' amendment filed on November 22, 2004 has been entered on December 15, 2004.

Therefore claims 1-11 as recited in the amendment and claims 12-13 as previously allowed are currently pending in the Application.

Claims 14-20 were previously cancelled.

Allowable Subject Matter

Claims 1-11 and 12-13 are allowed.

The following is an examiner's statement of reasons for allowance:

The prior art taken either singularly or in combination fails to anticipate or fairly suggest the limitation of the dependent claims, in such manner that a rejection under 35 U.S.C. 102 or 103 would be proper. The prior art fails to teach a combination of all the claimed features as presented in independent claims, which include a method for forming a semiconductor device including the steps of forming a trench isolation structure and an active region proximate an outer surface of a semiconductor layer, depositing an epitaxial layer outwardly from the trench isolation structure, growing a first insulator outwardly from the epitaxial layer, growing a second insulator layer outwardly from the first insulator layer, forming a gate stack outwardly from the epitaxial layer, the stack comprising a portion of the first insulator layer, a portion of the second insulator layer and a gate having a wide and narrow region and heating the epitaxial layer to a temperature sufficient to allow for the epitaxial layer to form a source/drain implant region in the active region.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably
